

COMPEX™ CMX-B1HA
Breather Fabric

Ideally suited to high pressure autoclave applications.

FEATURES & BENEFITS

- Heavy weight polyester breather fabric suitable for use in either oven or high pressure autoclave environments.
- Functions very well when used at pressures of over 100PSI (6.9bar) and temperatures of 204°C (400°F), in a single layer.
- Can be used successfully when molding complicated shapes with tight radii at high pressures.

PROPERTIES

Maximum use temperature	204°C / 400°F
Color	White
Fiber	Polyester
Weight	380g/m ² / 11.3oz/yd ²

CMX-B1HA has no release characteristics and should be separated from the laminate by a suitable porous release fabric or film. CMX-B1HA is not intended to be used as a breather material alone in high pressure autoclave cures.

AVAILABILITY

Standard Width	1.52m - Available up to 6m (236in) wide to order	60in
Standard Length	Up to 50m	Up to 54.7yd
Cut shapes/slit widths	Available to order	

STORAGE

No special storage conditions required.

HEALTH & SAFETY

Please refer to the product MSDS for safe handling, personal protective equipment recommendations and disposal considerations.
